The figure is a scatter plot with a light gray background. It features a vertical blue line at approximately x=10. The x-axis is labeled 'Fontana' and the y-axis is labeled 'Ghiotto'. The data points are represented by small 'x' marks inside white rectangular boxes. The plot is divided into several distinct clusters of points, primarily located in the upper-left quadrant (x < 10, y < 10) and lower-right quadrant (x > 10, y > 10). A few points are scattered outside these main clusters, notably one near the top right and another near the bottom right.
