The figure consists of a grid of 40 rows and 15 columns. Rows are numbered from 10 down to 1 at the bottom. Columns are numbered from 15 on the left to 1 on the right. The grid is heavily shaded in gray, with alternating light and dark gray areas. Numerous 'X' marks are scattered throughout the grid, indicating specific data points or intersections. The distribution of 'X' marks is not uniform, with higher concentrations in certain sections, particularly in the upper half of the grid.

The figure is a scatter plot with the following characteristics:

- X-axis:** Labeled 'n' at both ends, with tick marks at 1, 2, 3, 4, 5, and 6.
- Y-axis:** Labeled 'X' at both ends, with tick marks at 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10.
- Data Points:** Represented by 'X' marks. They are clustered in several groups:
 - Group 1 (n < 1): 1 X at (1, 1)
 - Group 2 (n = 1): 1 X at (1, 1), 1 X at (1, 2), 1 X at (1, 3), 1 X at (1, 4), 1 X at (1, 5), 1 X at (1, 6), 1 X at (1, 7), 1 X at (1, 8), 1 X at (1, 9), 1 X at (1, 10)
 - Group 3 (n = 2): 1 X at (2, 1)
 - Group 4 (n = 3): 1 X at (3, 1)
 - Group 5 (n = 4): 1 X at (4, 1)
 - Group 6 (n = 5): 1 X at (5, 1)
 - Group 7 (n = 6): 1 X at (6, 1)
- Vertical Line:** A solid blue vertical line is drawn at n = 1.
- Horizontal Bar:** A thick grey horizontal bar is positioned above the x-axis, spanning from n = 1 to n = 7.
